                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Sequence 11, Application US/08646301A

Sequence 11, Application US/08646301A

Patent No. 619421

GENERAL INFORMATION:
APPLICANT: Richards, Cynthia Ann
APPLICANT: Richards, Cynthia Ann
APPLICANT: Huber, Brian E.
TITLE OF INVENTION: Transcriptional Regulatory Sequence of Carcinoembryonic Patent No. 6194211

TITLE OF INVENTION: Antigen for Expression Targeting
FILE REFERENCE: PB1508USW
CURRENT APPLICATION NUMBER: US/08/646,301A
CURRENT FILING DATE: 1996-05-16
NUMBER OF SEQ ID NOS: 25
SOFTWARE: PatentIn Ver. 2.1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Gaps

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    RESULT 126

US-09-134-246-1/c

Sequence 1, Application US/09134246B

Patent No. 6207377

GENERAL INFORMATION:

APPLICANT: Wayne, Jayong

TITLE OF INVENTION: Method For Construction Of Thermus-E. coli Shuttle

TITLE OF INVENTION: Westors And Identification of Two Thermus Plasmid

TITLE OF INVENTION: Replication Origins

FILE REFERENCE: Thermus Shuttle Vector

CURRENT APPLICATION UNIMER: US/09/134,246B

NUMBER OF SEQ ID NOS: 30

SOUTHARE: PatentIn Ver. 2.0

SEQ ID NO 1

LENTH: 10
                                                                                                                                                                                                                                                                                                                                                                                                                   APPLICANT: Wayne, Jay
APPLICANT: Wayne, Jay
APPLICANT: Xu, Shuang-Yong
TITLE OF INVENTION: Method For Construction Of Thermus-E. coli Shuttle
TITLE OF INVENTION: Vectors And Identification of Two Thermus Plasmid
TITLE OF INVENTION: Replication Origins
FILE REFERENCE: Thermus Shuttle Vector
CURRENT APPLICATION NUMBER: US/09/134,246B
NUMBER OF SEQ ID NOS: 30
SOFTWARE: Patentin Ver. 2.0

Patent No. 6284743

GENERAL INPORMATION:
APPLICANT: PARMACEK, MICHAEL S.
APPLICANT: PARMACEK, MICHAEL S.
TITLE OF INVENTION: PROMOTER FOR SMOOTH MUSCLE CELL EXPRESSION
TITLE APPLICATION WHERE: US/09/546,550
CURRENT PILING DATE: 2000-04-10
PRIOR PELICATION NUMBER: 09/258,367
PRIOR FILING DATE: 1999-02-26
NUMBER OF SEQ ID NOS: 55
SOFTWARE PATENTIN Ver. 2.0

Sequence 1, Application US/09664186
Fatent No. 6815537
GENERAL INFORMATION:
APPLICANT: Wayne, Jay
APPLICANT: Wayner, Jay
APPLICANTON: Method For Construction Of Thermus Plasmid
TITLE OF INVENTION: Replication Origins
FILE REFERENCE: Thermus Shuttle Vector
GURRENT APPLICANTON NUMBER: US/09/664,186
CURRENT PILING DATE: 2000-09-18
FRIOR PILING DATE: 1998-08-14
MANDED CONTROL OF THE CO
                                                                                                                                                                                                                                                                 ZIP: 94104

                                                                                                                                                                                                                                                                                        RESULT 141
US-09-772-719B-23

i Sequence 23, Application US/09772719B

i Patent No. 677043B

i GENERAL INFORMATION:

i APPLICANT: Zavada, Jan

PRETOTER OF INVENTION:

i TITLE OF INVENTION: MN Gene and Protein

NUMBER OF SEQUENCES: 86

CORRESPONDENCE ADDRESS:

i STREET 465 California Street, Suite 450

CITY: San Francisco

STATE: California
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           TOPOLOGY: linear

MOLECULE TYPE: DNA (genomic)

BESCRIPTION: Initiator consensus sequence

SEQUENCE DESCRIPTION: SEQ ID NO: 23:

Patent No. 6815537

GENERAL INFORMATION:
APPLICANT: Wayne, Jay

APPLICANT: Wayne, Jay

TITLE OF INVENTION: Wethod For Construction Of Thermus-E. coli Shuttle

TITLE OF INVENTION: Replication Origins

FILE REFERENCE: Thermus Shuttle Vector

CURRENT APPLICATION NUMBER: US/09/664,186

CURRENT FILING DATE: 2000-09-18

PRIOR APPLICATION NUMBER: US/09/134,246B

Patent No. 565957;
GENERAL INFORMATION:
TITLE OF INVENTION: Site Directed Recombination
NUMBER OF SEQUENCES: 2;
CORRESPONDENCE ADDRESS;
ADDRESSEE: Flehr, Hobbach, Test, Albritton & Herbert
STREET: Four Embarcadero Center, Suite 3400;
CITY: San Francisco
STATE: CA.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  0; Indels

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Description
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence

US-09-928-385B-24

US-09-928-365B-24

Sequence 24, Application US/09928385B

Publication No. US20030049625A1

GENERAL INFORMATION:

APPLICANT: Heyduk, Tomasz

TITLE OF INVENTION: A Rapid and Sensitive Proximity-Based Assay for the Detection

TITLE OF INVENTION: A Rapid and Quantification of DNA Binding Proteins

FILE REFERENCE: 16153-7963

CURRENT APPLICATION NUMBER: US/09/928,385B

CURRENT FILING DATE: 2002-01-14

SEQ ID NOS: 24

SEQ ID NO 24

Sequence 24, Application US/09928385B

Sequence 24, Application US/09928385B

Publication No. US20030049625A1

FRILICANT: Heyduk, Tomasz

TITLE OF INVENTION: A Rapid and Sensitive Proximity-Based Assay for the Detection

TITLE OF INVENTION: A Rapid and Quantification of DNA Binding Proteins

FILE REFERENCE: 16153-7963

CURRENT APPLICATION NUMBER: US/09/928,385B

CURRENT FILING DATE: 2002-01-14

SEQ ID NO 24

LENGTH: 10
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    ô
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Gaps

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         RESULT 44
US-10-821-566-138/C
US-10-821-566-138/C

Sequence 138, Application US/10821568

Publication No. US20040185497A1

GENERAL INFORMATION:
APPLICANT: Remacle, Jose
APPLICANT: Art, Muriel
APPLICANT: Art, Muriel
TITLE OF INVENTION: METHOD AND KIT FOR THE SCREENING, THE
TITLE OF INVENTION: DETECTION AND/OR THE QUANTIFICATION OF TRANSCRIPTIONAL
                                                                                                                                                                                                                                                                                                                                                                                                          Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   OTHER INFORMATION: consensus sequence for transcriptional factor p53
NUMBER OF SEQ ID NOS: 150

SOFTWARE: FastSEQ for Windows Version 4.0

SEQ ID NO 138

LENGTH: 26

TYPE: DNA

OCREANISM: Artificial Sequence
FEATURE:
OTHER INFORMATION: P53 transcriptional factor consensus sequence
NAME/KEY: misc_feature
COTHER INFORMATION: (1)...(26)

COTHER INFORMATION: (1)...(26)

COTHER INFORMATION: n = A,T,C or G
